The expansion of experiences that fill a space, infinite possibilities
beginning from a single point.

영수증사진기®

Objet · Space · eXperience

These three key elements that make up RECEIPT CAMERA are metaphors for infinity. The smallest single point that forms an objet expands to fill the space, spreading through your diverse experiences. Our small encounter, starting from just one point, holds the power to transcend each other's spaces and extend infinitely.

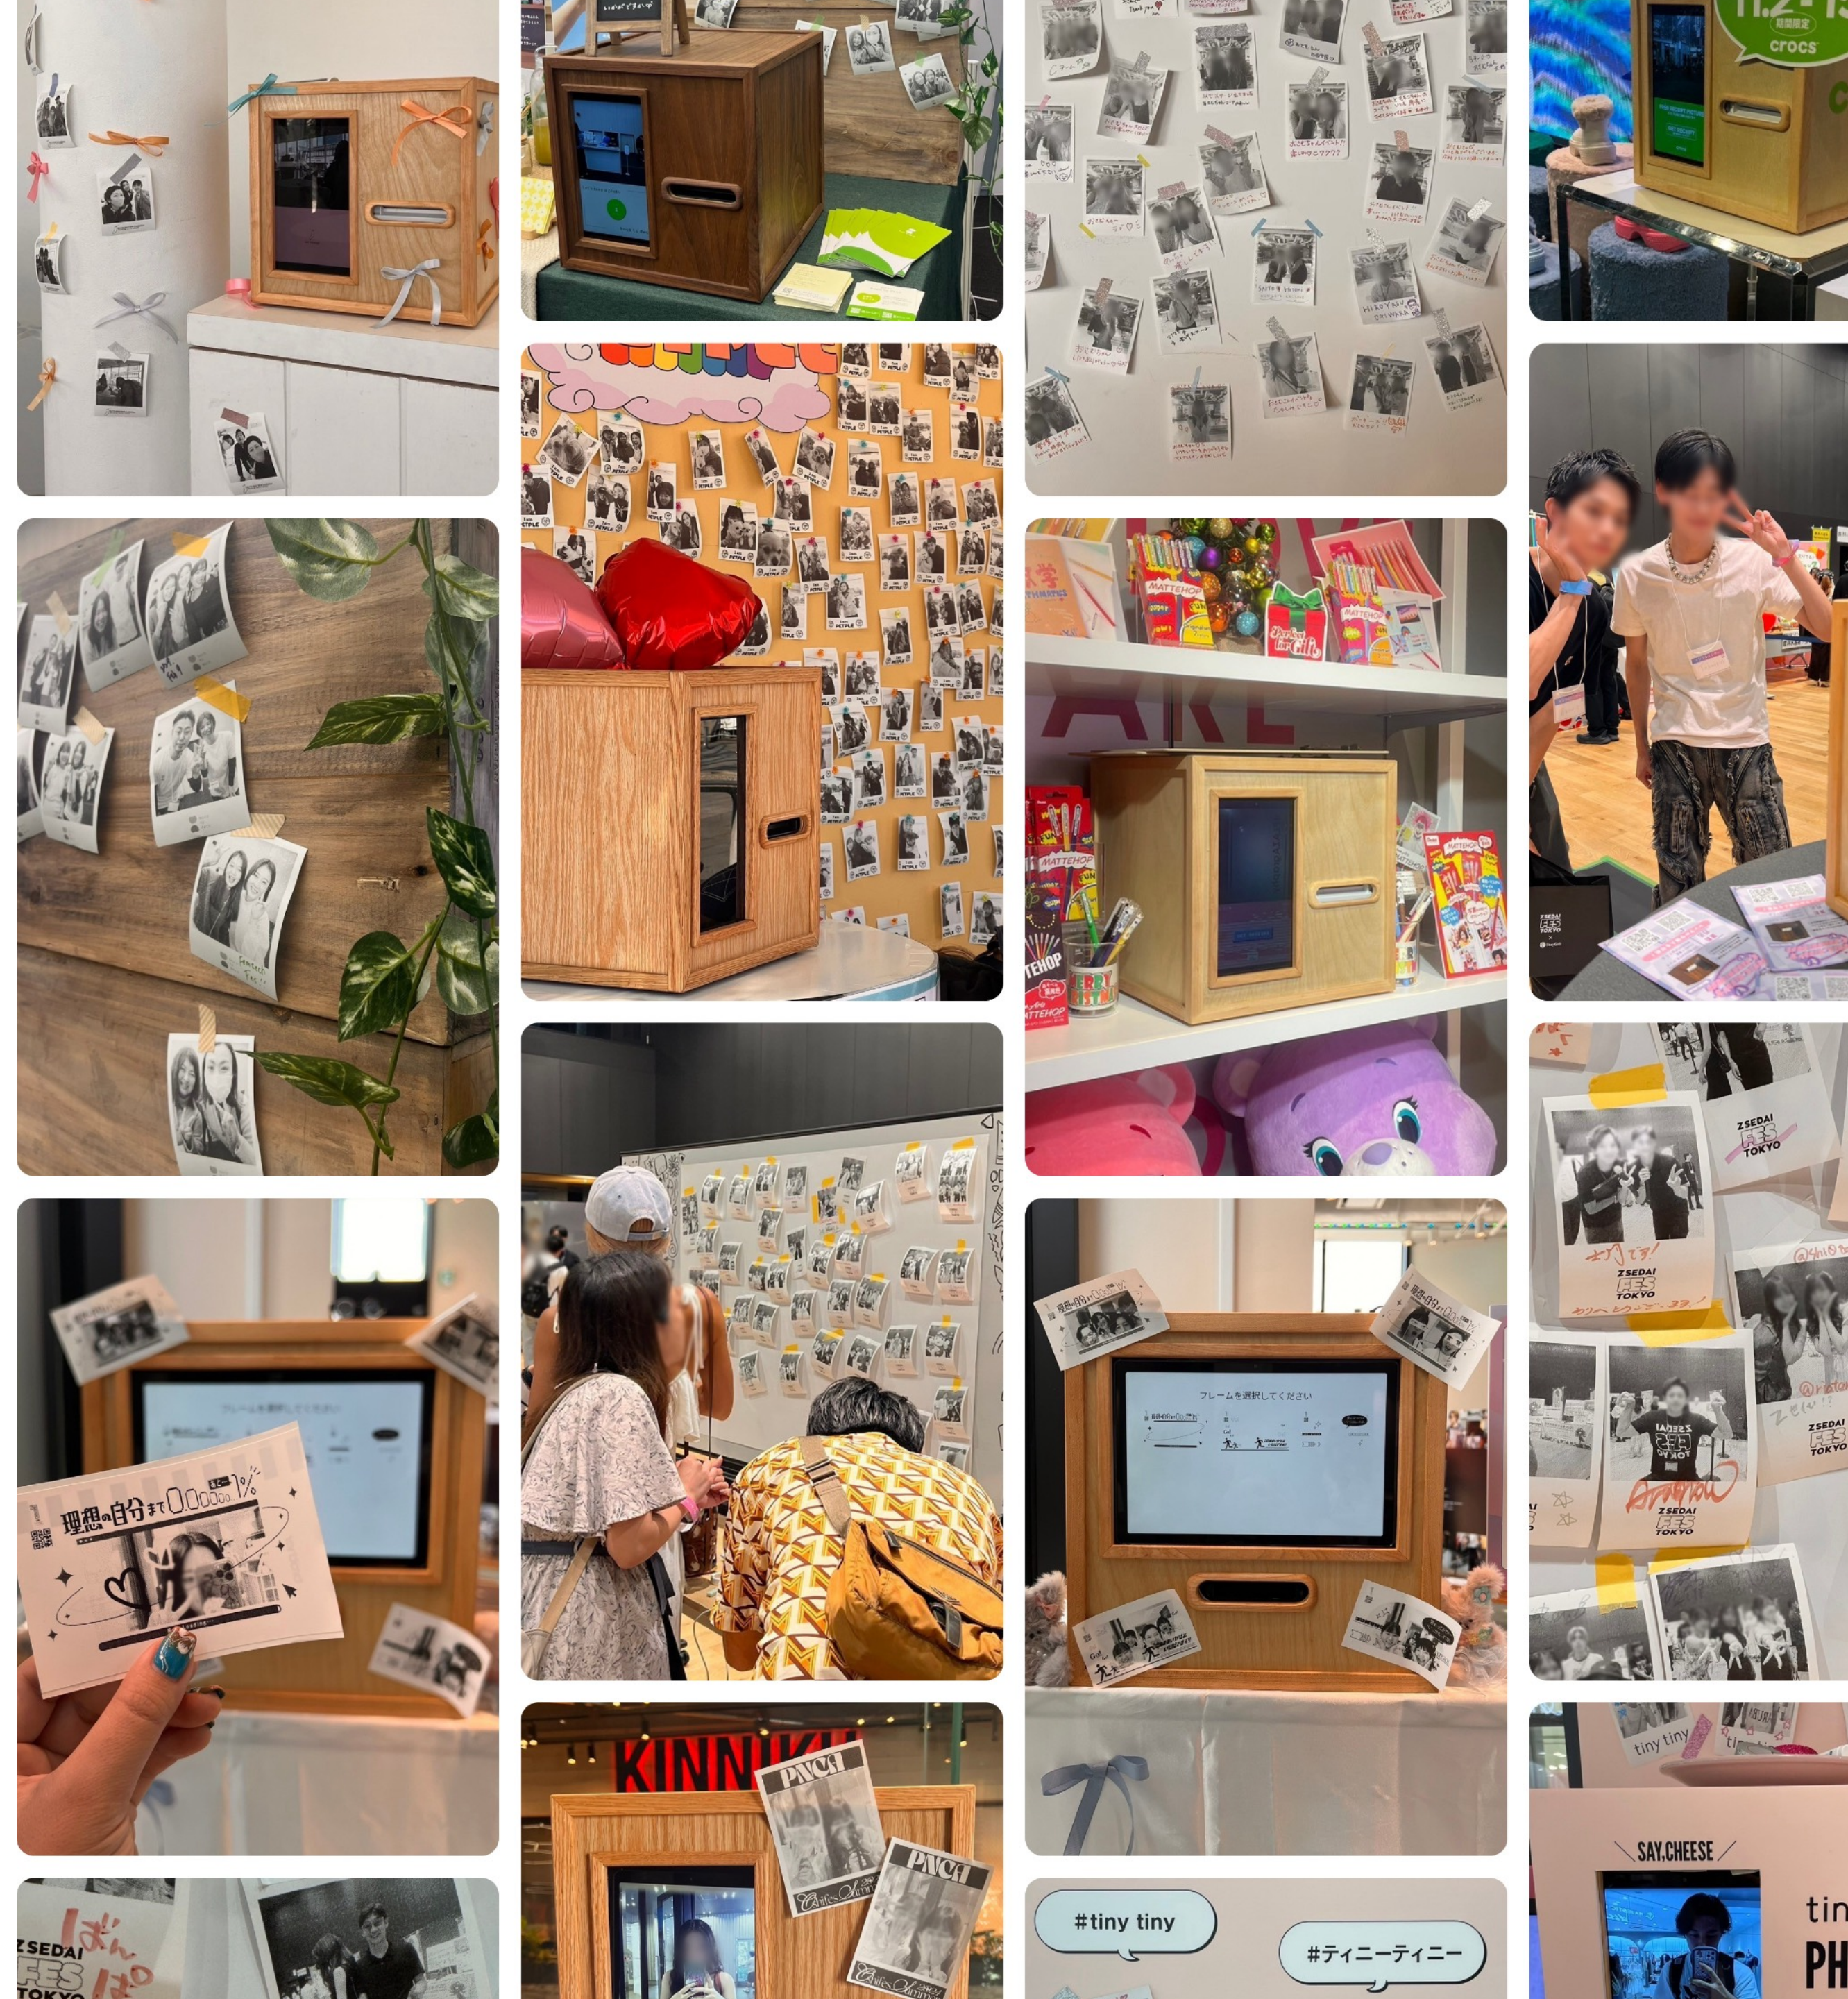

No longer, beyond any doubt, World-Class.

RECEIPT CAMERA® is a groundbreaking photo booth concept unlike anything seen before, first launched in South Korea in 2020 as the world's first of its kind.

Since its launch, RECEIPT CAMERA® has gained immense popularity over the past five years, not only in Korea but also in Japan, pioneering a new genre of photo booths with its unique receipt-style photographs in an otherwise stagnant market.

Now, it has become a beloved cultural phenomenon enjoyed by everyone, a fresh photo booth experience that captures moments and is cherished wherever memories are needed.

The RECEIPT CAMERA® is evolving into a new global icon, loved not only in Korea and Japan but also by people around the world.

The RECEIPT CAMERA® is a product with completed patents, trademarks, and design registrations.

Create a custom photo booth perfectly tailored to your brand using frames you've designed yourself.

The Custom Frame Feature is available in
STICKY FRAME and HYBRID

10-inch RECEIPT FRAME: 60 Preloaded Frames

2-Split Shooting and Printing

The RECEIPT CAMERA® 10-inch supports a multi-split shooting feature.

Admins can configure various shooting layouts, or users can select their preferred layout to perform split shooting and printing according to their preferences.

This feature allows for creative and fun photo booth setups using the multi-split shooting functionality.

The Multi-Split Shooting and Printing Feature is available in STICKY MORE.

STICKY MORE 2-Split Shooting Examples

Supports Both Paper Types

The HYBRID software, pre-installed on the RECEIPT CAMERA® 10-inch HYBRID, is compatible with both label sticker paper (used in existing 10-inch models) and standard receipt paper systems.

Equipped with advanced features such as the ability to add custom background frames, this is a high-end solution ideal for advanced users or corporate applications, allowing you to express everything you desire.

(Note: The receipt paper system requires an additional option purchase to enable receipt paper use.)

This functionality is supported exclusively on the 10-inch HYBRID model.
